

Pediatric Abusive Head Trauma Webinar

The focus of this training on abusive head trauma in infants and children will be recognition of the different types of abusive injuries, differential diagnosis (medical mimics and accidental injuries), and the approach to medical evaluation. There will be some discussion of current controversies in the field. The goal is provide information to the learner on mechanisms of injury and what to expect from medical evaluation, including imaging and laboratory findings.

Dr. Kathryn Coffman, M.D., completed her residency in pediatrics and a fellowship in adolescent medicine. She is board certified in general pediatrics and child abuse pediatrics. Dr. Coffman has been working in the field of child maltreatment since 1991, and at Phoenix Children's Hospital since 2011.
